

Go Green with Amphenol's Innovative and Sustainable Tech Service Bag

Amphenol is proud to introduce the new Tech Service Bag for all technicians using Amphenol drop cable. Designed with an array of features, this Tech Service Bag is an environmentally friendly solution that utilizes a reusable reel and a fully recyclable packaging design. With this sustainable packaging, ABS is working towards eliminating cardboard and plastic waste from our environment one truck at a time.

The bag and additional reel, with their small profile, are easily stored in the vehicle and saves much needed space.

This sturdy and water resistant bag, features a reinforced bottom capable of maintaining its shape and performing as a true technician assistant. Capable of holding a 500 ft coil using our special plastic reel, the coil can be changed quickly and easily with very little recyclable waste left to store in your vehicle.

Reel-less Cable Design:

Eco-Friendly Tech Service Bag and reusable reel

Eco Coil Packaging

Additional reel provided to interchange cable types in the bag effortlessly

Each technician will receive a new Eco Friendly Tech Service Bag with a reusable reel and one additional reusable reel that can be used for a different color of cable and changed out as needed.
