

Amphenol Broadband Solutions is pleased to offer this High Density Bracket, ideal for use in customer premises applications where multiple fiber and/or wavelength based services maybe offered.

This bracket takes advantage of the industry-leading density of ABS's HiD4 cassette to pack much greater fiber capacity into 1RU of space. Different HiD4 cassettes may be utilized on the bracket to bring customized services to commercial customers.

Because the bracket utilizes industry-standard LGX® dimensioning, it provides a "future proof" product deployment path by providing mounting options for standard-density LGX modules and the high-density HiD4 cassette.

1RU High Density Bracket

1RU HDS equipped with 6 HiD4 Modules (modules not included)

Features:

- Capacity of 6 HiD4 cassettes
- Capacity of 3 LGX modules
- Flush mount faceplate with 3.5" shelf extension
- Compact 1RU height
- Integrated mounting brackets with hardware included
- Generous fiber routing rings provide controlled jumper management

Specifications	
Rack Utilization	1RU
Height	1.75"
Width	19"
Depth	3.9"
Material	Powder Coated Aluminum - Black

Part Number	Description
ASBHDS1022744	High Density Premises Rack Bracket, 1RU
