

Amphenol is proud to announce the expansion of their product portfolio by offering a line of Category cables to meet the market demands for data communication wiring. As a part of this offering Amphenol is now manufacturing CAT5E, CAT6 and CAT6A cables available in a wide variety of constructions and colors. Amphenol is changing the customer experience by utilizing their eco-friendly coil solution to be utilized in the packaging available for these products. Traditionally category type cables come in boxes or on reels that end up in landfills, the new packaging design being offered by Amphenol will utilize our already successful eco-friendly technician service bags which will hold a 500' coil of the various cables. The eco-friendly technician service bag for category cables offers a professional and functional approach to structured wiring installations.

## Features:

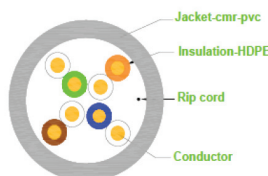

- ANSI/TIA 568-C.2
- NEC/CEC Type CMX Outdoor - CMR
- UL 444 Sunlight-Resistant
- UL 444
- RoHS Compliant Directive 2011/65/EU
- ANSI/TIA 862 (Building Automation)
- ICEA S-100-685
- ICEA S-102-700
- ISO/IEC 11801 Ed. 2.0 (Class E)
- Telcordia GR-3164
- Telcordia GR-3164 Severe Cold Impact

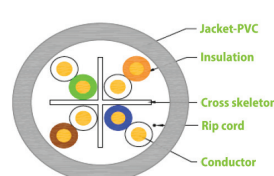

750' Box Packaging

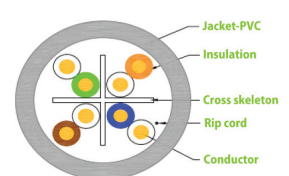

500' Eco-Friendly Re-Usable Reel

Part No. T5eUTP-CMR-GY-CF

Part No. T6sUTP-CMR-WH-CF

Part No. T6aUTP-CMR-WH-CF

## Available Colors:

Black	White	Gray	Red	Blue
Violet	Orange	Brown	Green	Yellow
