Infinity Premise System™

Key benefits the Infinity Premise System can provide your network

Amphenol Broadband Solutions is proud to offer the industry's only premises installation system that includes passives, actives and enclosures. The Infinity Premise System™ (IPS) streamlines the installation process, which reduces time spent in the customer's home while increasing system reliability.

Benefits:

- A complete line of premises products designed and built to work together as an installation system

- Upcoming system upgrades and improvements are simplified with the IPS as a foundational approach

- The IPS offers a full line of 1.2 GHz actives and passives

- IPS product standardization and integration is complemented by the ABS Training Program

- The IPS creates standard premises installations for more organized and easy-to-manage installs for your technicians
