

Sustainability 2019 Summary Report

Sustainability in Operations:

Sustainability is an increasingly integral part of our overall operations planning. We are constantly looking for new, insightful ways to measure our use of resources and are encouraged by the impact that even the simplest of changes have made on our operations.

The data collected revealed opportunities, which turned into projects that considered environmental protection, safety and health, and economic benefit, while still meeting company goals.

2018-2019 Reductions in Consumption

Global Reductions

- ↓ Electricity Kilowatt-hours: 13.7%
- ↓ Gallons of water: 15.9%
- ↓ Garbage tons going to landfill: 3.1%

Brazilian Reductions

- 🌿 Electricity Kilowatt-hours : 12.5%

Chatham Reductions

- 🌿 Electricity Kilowatt-hours : 19.5%

China Reductions

- 💧 Gallons of water: 67%

Renfrew Reductions

- 🌿 Electricity Kilowatt-hours: 14.6%
- 💧 Gallons of water: 25%

Our manufacturing locations **now use more natural light options** to minimize the use of electric lighting.

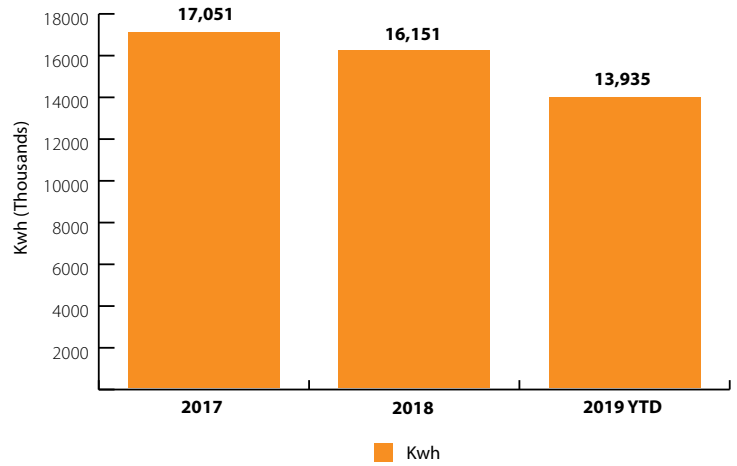

We've recently **installed water fill stations** to encourage the use of reusable water bottles.

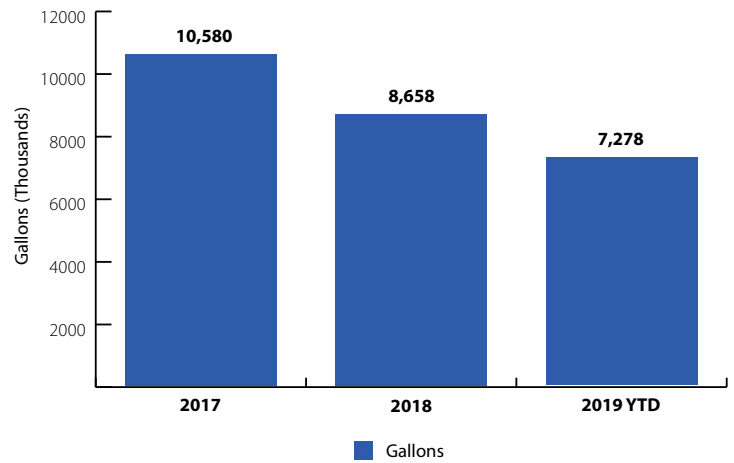

Product packaging has been redesigned to minimize waste and improve customer usability, like our Tech Service Bag.
